

# Knitting with Wire

## Basic Bracelet

### Materials:

Craft wire 0.2mm available here [NEW 35gram REELS 0.2mm COLOURED COPPER CRAFT WIRE](#)

4mm knitting needles [preferably not metal, as this can strip off the wire colour coating]

Beads with holes greater than 0.2mm

Sewing needle

Small amount of waste yarn

## Method

- Cast on 6 stitches with waste yarn, knit 2 rows.
- You will use two strands of wire. Thread the wire with beads before you start knitting with it. [suggest 30+ beads]
- Knit with the wire, garter stitch.
- Whenever you wish, bring up a bead to the needles and knit it into the stitch
- Knit about 8 inches in length [depending on the size of your hand]. You can manipulate the knitting to stretch out either in length or width.
- Finish by sewing the stitches to the beginning of the knitting, forming a bracelet. Remove waste yarn.
- You could sew in a clasp instead of joining if you wanted a tighter fitting bracelet.

## More ideas to try

Wire i-cords can make 'chains' for pendants

Knit a shape - make a pendant

Combine wire and yarn - perhaps one strand of wire with 4 ply yarn
